

The **piece**(**pie**) chart illustrates the number of tourists (verb???) to a local cinema according to age in 2000.

Overall, while the largest **perantage**(**percentage**) of tourists went to local cinema **on**(**were**) people **whose** aged (**is**) over 55, the smallest percentage went on people aged 31-45.

The number of visitors who were over 55 years old were (**the most frequently visited**) **highest** among the others with 51%, it made up **two times as high as** (**as twice as**) **that for** the second largest group, the ages 10-15 group which (**was**) 21%

The figure for tourism in 31 to 45 years old was the last group, accounting (**for**) 5%, **which was a third of figure for people who were in the 16-20 age**. Lastly, the people aged 21-30 was the **fourth section** and stood at 8% in total.

The pie chart illustrates the number of tourists visited a local cinema according to age in 2000. Overall, people who were over 55 was the most frequently visited the cinema while people from 30s to mid 40 rarely came to the cinema.

The largest group of people came to the cinema, 55 years old and above, was accounting for more than half of the cinema visitors while the second most popular age group, 10 to 15 year old, was less than half of the first group which is 21 percents. The third age group that took 15 percents of the total cinema guest was between 16 and 20 years old.

Lastly, the people from 31 to 45 years old and 21 to 30 years old accounted for the smallest cinema visitor portion which were 5 percents and 8 percents respectively.
